Re: Return of Uncompleted Annual Stormwater Discharge Report
Submittal of Notice of Termination for the General Permit

Dear Mr. Radulescu:

Enclosed is CENCO Refining Company's (CENCO) uncompleted *Annual Report for Stormwater Discharges Associated with Industrial Activities* form. Other than the facility name correction on items B and C, no other changes or entries were made. Powerine's stormwater discharge is regulated under a site specific discharge permit, therefore, CENCO is not regulated under the General Permit, and need not submit annual reports. Last year, per your instructions, and to avoid future confusion, Powerine (now CENCO) filed a Notice of Termination for the General Permit.

The RWQCB issued order number 94-124 for CENCO's NPDES stormwater discharge, potential HF alkylation deluge discharge, cooling tower blowdown, and boiler and water softening blowdown. CENCO's NPDES number is CA0057177. Since the refinery temporarily suspended refinery operations in July 1995, the only NPDES discharge has been stormwater discharge.

Although CENCO has not refined crude oil for the last four years, CENCO continues to conduct required waste discharge analyses as if the refinery were still in operation. Monthly and quarterly NPDES reports are being sent to Dennis Dickerson at CRWQCB and USEPA Region 9 as required.

Please feel free to contact Neil Norcross of my staff if you have additional questions.

Thank you for your assistance.

Sincerely,

June M. Christman
Manager - Environmental Engineering
